## Introduction

The Performance/Income page provides a summary of yearly statistics for a selected account. It is comprised of a robust set of data including performance over time, portfolio value and income by model on one easy to read page.

# **Navigation**

Depending on the role provided by the RIA; you will either see a tab labeled Performance or a tab labeled Income. Both will display an individual account view.

## Performance Screen

Selecting the Performance tab will display the Performance screen

#### **Income by Model**

The Income by Model displays a listing, by model, of the earnings posted to the account. The earnings and other values shown on this page are estimated figures. These values may differ from those shown on your statements. The year to date information is based on realized earnings. Unrealized earnings are not included.

Please note, realized gains and losses do not include securities with a zero cost basis (N/A) Model: Clicking on the listed Model link will raise a popup containing more earnings information.

- *Dividends*: These are the dividends paid to an account for the selected year.
- Interest: Refers to the interest paid on an account for the selected year.
- Realized Gains/Loss: This is the amount of profit or loss that is applied to an account due to selling securities. Equities use trade lot/tax lot cost for determining gains/losses. For all other assets, cost basis reflects average cost unless your Investment Advisor has elected to report actual cost for all securities. Note: Realized gains and losses do not include securities with a zero cost basis (N/A).
- *Capital Gains*: This refers to the short and long-term capital gains distributions paid to an account for the selected year.
- Total Earnings Year to Date: This represents the sum of interest, dividends, short-term and long-term capital gains distributions, non-taxable dividends, non-taxable interest and short-term and long-term realized gains and losses.
